

Berenberg Multi Asset Defensive R D

Actively managed multi asset fund

Investment Strategy

The Berenberg Multi Asset Defensive is an asset-managing fund with a total return approach* and invests in stocks, bonds, alternative investments and liquidity. Based on several indicators (macroeconomic, fundamental, technical) the investment ratio, the duration as well as the regional and sector allocation are managed. The share of equities is limited to 50% of the portfolio. The fund invests in single stocks, actively managed funds as well as passive Exchange Traded Funds (ETFs). A specific attention is given to a systematic risk management. *The funds total return approach objective is a long-term capital appreciation (investment horizon at least 3 years) while pursuing a systematic limitation of the risk of loss. Active approach, i.e. index weights have no influence on individual stock selection.

Fund management comment

Following corrections in April, global equity markets rallied strongly in May, reaching new all-time highs. US equities rose the most as US Treasury yields fell early in the month on weaker economic data, benefiting growth stocks in particular. Europe outperformed the US in May on the back of positive earnings revisions and a recovering economic environment. Given the positive economic surprises and the impending interest rate cuts in Europe, we have recently increased our exposure to high-quality small cap stocks. Our slight overweight in duration weighed on the fund towards the end of the month as bond yields rose in Europe. Within bonds, we bought financial bonds and slightly reduced covered bonds and quasi-government bonds. Gold and silver rose to new highs in May, which we used to take profits. Over the course of the month, industrial metals and commodities traded volatile sideways.

Opportunities

- Attractive return potential over the medium to long term
- Above-average performance by exploiting investment opportunities across regions and asset classes, with a focus on intelligent diversification
- Stabilization of assets in negative capital market phases through professional risk controlling
- Possible additional returns through active management

Risks

- Volatility of equities, bonds and currencies can lead to price losses
- Unit value may fall below the purchase price at which the customer acquired the unit
- No guarantee of success through active management
- Derivative transactions: Increased opportunities are accompanied by increased risks of loss. Furthermore, the fund's profit opportunities may also be reduced by hedging against losses using derivatives

Further details on the opportunities and risks of this fund can be found in the sales prospectus.

Important notes:

This information is a marketing communication. This information and references to issuers, financial instruments or financial products do not constitute an investment strategy recommendation pursuant to Article 3 (1) No. 34 Regulation (EU) No 596/2014 on market abuse (market abuse regulation) nor an investment recommendations pursuant to Article 3 (1) No. 35 Regulation (EU) No 596/2014, both provisions in connection with section 85 (1) of the German Securities Trading Act (WpHG). As a marketing communication this document does not meet all legal requirements to warrant the objectivity of investment recommendations and investment strategy recommendations and is not subject to the ban on trading prior to the publication of investment recommendations and investment strategy recommendations. This document is intended to give you an opportunity to form your own view of an investment. However, it does not replace a legal, tax or individual financial advice. Your investment objectives and your personal and financial circumstances were not taken into account. We therefore expressly point out that this information does not constitute individual investment advice. Any products or securities described may not be available for purchase in all countries or only in certain investor categories. This information may only be distributed within the framework of applicable law and in particular not to citizens of the USA or persons resident in the USA. The statements made herein have not been audited by any external party, particularly not by an independent auditing firm. Any future returns on fund investments may be subject to taxation, which depends on the personal situation of the investor and may change in the future. Returns on investments in foreign currencies may increase or decrease due to currency fluctuations. The purchase, holding, conversion or sale of a financial instrument, as well as the use or termination of an investment service, may give rise to costs that affect the expected income. In the case of investment funds, you should always make an investment decision on the basis of the sales documents (key investor document, presentation of past performance, sales prospectus, current annual, if applicable, semi-annual report), which contain detailed information on the opportunities and risks of the relevant fund. In the case of securities for which a securities prospectus is available, investment decisions should always be made on the basis of the securities prospectus, which contains detailed information on the opportunities and risks of this financial instrument, otherwise at least on the basis of the product information document. An investment decision should be based on all characteristics of the fund and not just on the sustainability-related aspects. All the aforementioned documents can be obtained from Joh. Berenberg, Gossler & Co. KG (Berenberg), Neuer Jungfernstieg 20, 20354 Hamburg, Germany, free of charge. The fund sales documents and the product information sheets for other securities are available via a download portal using the password »berenberg« at the Internet address <https://docman.vwd.com/portal/berenberg/index.html>. The sales documents of the funds can also be requested from the respective investment management company. We will be pleased to provide you with the specific address details upon request. A fund investment involves the purchase of shares in an investment fund, but not a specific underlying asset (e.g. shares in a company) held by that fund. The statements contained in this document are based either on own company sources or on publicly accessible third-party sources, and reflect the status of information as of the date of preparation of the presentation stated below. Subsequent changes cannot be taken into account in this document. The information given can become incorrect due to the passage of time and/or as a result of legal, political, economic or other changes. We do not assume responsibility to indicate such changes and/or to publish an updated document. Please refer to the online glossary at www.berenberg.de/glossar for definitions of the technical terms used in this document.

Sector Allocation by GICS Sector distribution by GICS: The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of the McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Joh. Berenberg, Gossler & Co. KG. Neither MSCI, S&P nor any third party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

BVI method: The charts and tables regarding performance shown here are based on own calculations according to the method developed by the German Investment Funds Association (BVI). They illustrate past performance. Future performance can deviate both positively and negatively from these calculations. Gross performance (BVI method) takes into account all charges at fund level (e.g. management fee), net performance plus the issue surcharge. Additional charges can arise for individual investors (e.g. custody account fees, commissions and other fees). Model calculation (net): An investor wants to purchase fund units for EUR 1,000 Euro. Considering a max 5.50. issue surcharge of 5.50 he has to pay EUR 55.00 Euro for the purchase. Also, fees may be charged for the administration of the safe custody account, which will lower the performance. Past performance is not a reliable indicator of future performance.
