

## Berenberg Euro Enhanced Liquidity R D

Actively managed fixed income fund

### Investment Strategy

The fund focuses its investments on bonds with fixed or variable interest rates from European issuers mainly with investment grade rating (AAA to BBB- according to the classification of rating agency Standard & Poor's). Apart from government bonds, Pfandbriefe and corporate bonds, the fund also invests in money market paper. In line with the investment horizon, the special assets are invested mainly in euro-denominated bonds with short to medium durations. Additionally, durations can be managed actively and dynamically. Active approach, i.e. index weights have no influence on individual stock selection.

### Fund management comment

The combination of the upcoming US election on November 5, higher inflation figures in the US and the eurozone and a strong US labor market report at the beginning of the month were drivers for rising yields. Overall, this led to concerns among market participants that disinflation is progressing more slowly than initially assumed or that inflationary pressure will rise again. On October 17, the ECB lowered the deposit rate for the third time in a row by 25 bp to 3.25%. The yield on 2-year German government bonds rose by 21 bp. The risk premiums on corporate bonds remained stable after a slight fall of just under 4 bp over the course of the month. The primary market weakened due to political uncertainty and the trading halt prior to the publication of the quarterly figures.

### Opportunities

- High return potential and current income from coupon collection
- Possible additional income through security analysis and active management

### Risks

- The fund is subject to general market risk
- The value of the fund's assets, and thus the value of each individual unit, may rise or fall compared with the issue price. As a result, investors may not fully recover their invested money at the time they sell their units.

Further details on the opportunities and risks of this fund can be found in the sales prospectus.

Neither MSCI, S&P nor any third party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

**BVI method:** The charts and tables regarding performance shown here are based on own calculations according to the method developed by the German Investment Funds Association (BVI). They illustrate past performance. Future performance can deviate both positively and negatively from these calculations. Gross performance (BVI method) takes into account all charges at fund level (e.g. management fee), net performance plus the issue surcharge. Additional charges can arise for individual investors (e.g. custody account fees, commissions and other fees). Model calculation (net): An investor wants to purchase fund units for EUR 1,000 Euro. Considering a max 5.00. issue surcharge of 5.00 he has to pay EUR 50.00 Euro for the purchase. Also, fees may be charged for the administration of the safe custody account, which will lower the performance. Past performance is not a reliable indicator of future performance.
