

Berenberg Credit Opportunities R D

Actively managed fixed income fund

Investment Strategy

The Berenberg Credit Opportunities is a benchmark independent, flexible bond fund with an investment focus on global corporate bonds. The investment strategy makes it possible to invest in securities from all sub-segments of the bond market. The objective of the investment strategy is not only an attractive return, but also the generation of continuous coupon income. In the medium term, the formation of a total return character is aspired. Interest, credit and currency risks can be actively managed using derivatives. With its offensive management, the fund can increase the earnings opportunities of existing bond portfolios as an addition and is suitable for investors who can tolerate higher fluctuations in the fund price for this portion of their investments. Note: The investment strategy of the fund was changed as of 22.05.2018.

BVI method: The charts and tables regarding performance shown here are based on own calculations according to the method developed by the German Investment Funds Association (BVI). They illustrate past performance. Future performance can deviate both positively and negatively from these calculations. Gross performance (BVI method) takes into account all charges at fund level (e.g. management fee), net performance plus the issue surcharge. Additional charges can arise for individual investors (e.g. custody account fees, commissions and other fees). Model calculation (net): An investor wants to purchase fund units for EUR 1,000 Euro. Considering a max 3.00. issue surcharge of 3.00 he has to pay EUR 30.00 Euro for the purchase. Also, fees may be charged for the administration of the safe custody account, which will lower the performance. Past performance is not a reliable indicator of future performance.
